DETAILED ACTION

Response to Amendment

Applicant submitted an amendment dated April 26, 2006, wherein claim 1-15 are pending, claims, 2, 10 and 13-15 were allowed and claims 7-9 were withdrawn from consideration by the examiner to being drawn to an elected species.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Lambiaso'000 (US Patent No.6, 674,000).

Regarding claim 1, Examiner observes that applicant refers to an electric vehicle in which examiner takes an aircraft to provide electricity throughout the aircraft.

Lambiaso discloses power cables (see figure 5, element 24) laid out along an underside of a floor (see figure 5, element 36) of an electric vehicle, metallic protection pipes for passing the power cables individually therethrough (see figure 5, element 44) also (see figure 6A,element 66), metallic protection pipes are then retained on the underside of the floor of the vehicle (see figure 5).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lambiaso'000 (US Patent No.6, 674,000).

Regarding claim 4, Lambiaso lacks the teaching of a pipe formed by being bent after the power cable is passed therethrough, Examiner is taking official notice that it is common knowledge to one of ordinary skill in the art to bend the pipe after the power cable is passed therethrough creating an orderly look to the cables (See section 2144.03 of MPEP).

Response to Arguments

Applicant's arguments, see page 3, filed April 26, 2006, with respect to the rejection(s) of claim(s) 1 and 4 under 102(e) have been fully considered and are persuasive.

Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Lambiaso'000 (US Patent No.6, 674,000).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cynthia F. Collado whose telephone number is (571)2728315. The examiner can normally be reached on mon-fri 8-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Ellis can be reached on (571)2726914. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
